# COMPANY

Young, vibrant, and cutting-edge: At WM technics, innovation is our top priority - for both us and our clients. Established in 1986, WM technics crafts premium ice resurfacing machines suitable for every surface and requirement. Our state-of-the-art models stand out with their advanced technology, user-friendly operation, certified safety, and contemporary design.

## Here's what we have to offer

Whether catering to professional ice needs within an arena or on a transportable rink, the distinction is minimal: WM technics consistently offers the optimal solution for any requirement. Owing to our relentless pursuit of product excellence, we pioneer cutting-edge standards and stand as a prominent leader in the worldwide market. Powered by our robust digital infrastructure, design, part production, and the assembly of ice resurfacing machines are conducted at our South Tyrol-based facility (Italy). In this

manner, WM technics guarantees unparalleled quality, attending to every intricate detail. Bespoke setups built on customer specifications, reduced maintenance commitment, and steadfast assistance affirm WM technics as a powerful ally.

Lukas, Assembly Team

#### WM plus

#### Always Ahead of the Curve

With precision, we delve into research, trials, and connections. Our team's years of prowess in development, manufacturing, and setup culminate into a harmonious synergy.

#### Safety at its Finest

Our cardinal rule: Prioritizing safety and well-being. WM technics' ice machines are designed with intuitiveness and uncompromised safety, meeting European machinery guidelines.

#### Design with a Spark

WM technics brings to life trailblazing ice machines, always keeping the client and entire production lifecycle at heart.

#### **Precision Production**

WM technics manufactures all its turning and milling components with utmost precision in its production department, only sourcing standard parts from reputed manufacturers. Each component is then customized in detail based on its function and crafted with the greatest care.

#### Streamlined Assembly

WM technics champions the rapid production of ice machines, backed by rigorously organized processes. Every move is intricately mapped and transparent. Our commitment to precision minimizes the need for maintenance.

#### 360-Degree Quality

WM technics designs and produces innovative ice resurfacing machines that meet all efficiency, reliability, longevity, and ease-of-use requirements. Series construction and in-house production also allow for the detailed tracking of all fabrication stages and utilized components.

#### Sustainability with Vision

WM technics machines are designed to stand the test of time. We advocate for enduring products while keeping an eye on operational expenses. Balancing energy conservation, reduced consumption, and profitability doesn't deter us from delivering peak performance.

#### Customer-Centric Assistance

Just as our machines care for the ice, we cherish our relationships with our customers: not only before the purchase but also during the commissioning and afterwards. We meet our clients' unique requirements even during the production process, tailoring our approach to their needs.

# Compact

ELECTRIC / LITHIUM DIESEL

# Compact

Compact: the compact, professional solution for perfect ice on smaller areas.

# The compact ice resurfacer from WM for small rinks and surfaces of up to 1,200 m<sup>2</sup>.

Compact is the compact professional ice resurfacer for large and small mobile rinks. While the powerful diesel engine is suitable for outdoor use, the electric model with its emission-free AC motor is ideal for indoor use.

The robust Compact resurfacer planes the ice as well as a large professional machine, is easy to use, highly manoeuvrable and offers maximum driver comfort. The Compact guarantees professional ice resurfacing on smaller areas and thus outstanding ice quality for mobile rinks.

| *          | Snow tank volume   | 1.8 m³ / compacted 2.25 m³ |
|------------|--------------------|----------------------------|
| <i>⊗</i> ≈ | Water tank volume  | 600 I                      |
|            | Blade width        | 1,700 mm                   |
| <u></u>    | Field of operation | Mobile / Event             |

"People love our ice rinks! This is due to their perfect ice quality, made possible by WM's Compact, a small, agile ice resurfacer that performs like its big brothers."

Marcel Krenn - *Technician* AST Eis- und Solartechnik GmbH, Höfen (Austria)

# Efficient ice resurfacing

# Compact may be small, but it planes the ice like a large-scale pro!

With its tried and tested planing system, snow-breaker and integrated side brushes, Compact guarantees perfect, professional ice resurfacing. The hydraulic brushes ensure perfectly smooth edges.

## 600 litres water

## Outstanding planing performance

#### Integrated side brush

# Ease of use

Compact is easy to use, highly manoeuvrable and offers maximum driver comfort. Emptying the coated snow bin is also very easy.

Versatility and practicality combined: its low weight and small size make Compact the perfect choice for an easily transportable ice resurfacer. It can be moved between events on a simple trailer without wasting time on loading and unloading.

#### Easy to empty

#### Clear overview of controls

# Maintenance

The engine compartment is easily accessible, with no dismantling required. Maintenance is thus quick and inexpensive.

Diesel engine compartment

Electric engine compartment

Battery watering system

Ease of battery maintenance

#### Easily and quickly accessible

#### Low maintenance costs

## **Energy efficient**

## **TECHNOLOGY**

Available in two versions – with a diesel engine for outdoor use or an electric motor for indoors – Compact offers outstanding robustness and manoeuvrability. The compact design is combined with high power, meaning its performance is comparable to larger machines.

## Electric/Lithium

# STRENGTHS

WM technics: excellence in design and quality. Machines manufactured in-house. Ease of maintenance. Rapid access to spare parts. Your guarantee for the highest quality standards. At WM technics, we strive for excellence at every stage of our work. Our machines, especially the WM Compact, are the result of high-quality components and meticulous design that minimizes maintenance effort. Designed, manufactured, and assembled in our own facilities, we guarantee top quality and timely deliveries. From component to the finished product - every step is closely monitored to deliver to you the ice resurfacing machines of the future.

#### User friendliness

#### Quality guarantee

## The right replacement part, every time

Through the use of top-quality components together with a well-planned design, maintenance work is extremely simple and is reduced to a minimum.

The WM Mammoth is a product which has been developed, built and assembled in house, from start to finish. Only by doing so can we guarantee top quality and punctual delivery times.

Order your spare parts easily and conveniently from our online portal: Our series number and digital image system enable you to find the part you need with just one click.

#### Series production

#### Service and support

All WM technics vehicles are seriesmanufactured. We know exactly which parts have been used in each series run, and can deliver the correct spare parts to you at all times. At the same time, a number of optionals can be retrofitted with minimum effort and maximum precision, even years later.

Our well-networked, international team of technicians undergo constant training and will be delighted to help you whenever you require assistance.

From the manufacture of individual parts right through to the final quality-control inspection: Every step of the process is carried out and monitored with the utmost of precision. Each and every member of our staff is well-trained in his specialist field, and carries out all tasks conscientiously. This is a great advantage for our customers, who can be sure of receiving a technologically sophisticated product which has been manufactured to the very highest of quality standards.

# PRODUCTS

Dive into the world of WM technics: Where cutting-edge design meets top-notch quality. Here begins the journey to top-tier ice resurfacing machines and #perfectice.

#### **Pinguino**

The Pinguino makes maintaining mobile ice rinks a cinch. Pairing efficiency with unmatched quality, it's a game-changer in the realm of ice care. You'll consistently get predictable cleaning durations and just the right ice thickness, saving you time and workforce. What's the payoff? Glistening ice that'll charm every visitor, young and old.

A standout feature? The front seat placement for the driver. Whether seasoned in the ice world or just getting started, this seat offers an unparalleled view and top-tier comfort. Dive into a new era of ice maintenance with the Pinguino!

Discover a new dimension in ice maintenance with the Pinguino!

#### Shira

Prepare to be dazzled by the Shira! Not only does she operate electrically and whisper-quiet, but she also impresses with her incredibly user-friendly controls. Ice maintenance becomes a breeze with keyboard commands, a clear info display, and an automatic mode. Need to get hands-on? No worries! Quick access to the mechanics means maintenance and service

are done in a flash, saving you a pretty penny.

The icing on the cake: The ice quality is simply top-notch, right down to the last detail. And, even with its traditional blade exchange system, she boasts unbeatable value for money. Discover the Shira – your new star on ice!

Introducing Shira, your new shining ice star.

#### Mammoth

Mammoth is the powerful ice resurfacer designed for stadiums and ice surfaces up to 1,800 m².

Powerful, maintenance-free AC motors, large snow and water tanks, and a quick blade change system designed for whatever challenge may come. Thanks to its compact design, the

machine achieves a minimal turning radius, allowing for fast, efficient, and non-deviating ice surface treatment.

Maximum stability? You bet! The sprung edger is mounted directly on the WM Mammoth, ensuring maximum stability and the best working performance.

High-performing, accurate, and automated: Mammoth. Unprecedented resurfacing for unprecedented ice quality.

#### evo<sup>2</sup>

Whether it's vast ice rinks or grand stadium ice surfaces – with our evo², you'll glide effortlessly over any expanse. The swift blade changes, ultra-light blades, and the harmony between the board mill and brush ensure perfect ice. Every ride feels like a leisurely spin inside the spacious cabin (included as standard!). And when the

going gets tough? Just lift the cabin and experience a swift, cost-effective service. With the powerhouse evo², ice maintenance becomes a piece of cake!

Harnessing the strength of evo<sup>2</sup> makes ice maintenance effortless!
