

Flail mower SM

One of the most effective setups combines the implement mast with the flail mower. Together, they form a highly adaptable solution that handles tall grass, overgrown embankments, and vegetation-covered traffic islands with ease. Whether you're mulching at ground level or trimming vertically along roadsides, you can rely on consistently precise and efficient performance.

Technical data

Operating width	800 mm or 900 mm
Working rpm	2,000 - 3,000 rpm
Hydraulic system for flail mower axle	min. 35 l/min at 250 bar
Necessary hydraulics for cylinder movement	min. 10 l/min at 130 bar
Weight	450 kg
