

Flail mower

Thanks to our implement mast, our flail mower transforms into a multipurpose mulching device or a boom-mounted verge mower for cutting at various heights and depths. If combined with the hydraulic shoot remover, the mower can also be used for comprehensive maintenance between rows of any type, eliminating the need for tedious manual work.

Technical data

Operating width	800 mm or 900 mm
Working rpm	2,000 - 3,000 rpm
Hydraulic system for flail mower axle	min. 35 l/min at 250 bar
Necessary hydraulics for cylinder movement	min. 10 l/min at 130 bar
Weight	450 kg
